

We design and manufacture the very best shelves and parts for your alcove spaces. You get the best quality product with a made to measure service at a competitive price. Our shelving system isn't like other modular systems as we combine our system with made to measure parts. This means we can cut our shelves, desks and cabinets to perfectly fit your alcoves. We can design a system for you, but if you're interested our guide and tips will help you.

## TIPS\*

- Parts are finished and don't need painting
- Paint your walls or decorate before fitting
- Fitting is clean and tidy
- Fitting should take half a day

## 08 WALL RAILS POSITION

They are used in combination with our wall brackets and act as the structure for the system. Wall rails can be moved horizontally to help avoid any wall sockets or light switches. A minimum of two rails need to be positioned for each alcove. See our installation guides for fixings and wall types.

## 01 CUT TO SIZE

Our shelves, desks and cabinets are made from high quality aluminium parts. They can be cut to any size and so will perfectly fit your space. Our shelves do not touch the side walls but are cut 15mm smaller at each end giving the appearance that they float.

## 02 ADD DEEPER SHELVES

Our 345 deeper shelves are easily large enough for a TV stand, extra large books or vinyl. All our shelves are designed for heavy books.

## 03 HEIGHTS CAN BE ADJUSTED

Our shelves and cabinets can be moved up or down the wall rails in 5cm (50mm) increments. Work out the height of items going into your shelves and then give them a bit more space, or leave out a shelf to make an extra tall display space for pictures and vases.

## 04 ADD LIGHTING

Our lighting shelves come with under shelf lighting built in. All low voltage and easy to setup so long as there is a wall power socket in the same area. Great for making a feature or display wall, or try adding one shelf with lighting above a desk.

## 05 ADD CLOTHES HANGERS

Not all alcoves are in your living room. Try using alcoves in your bedroom or wardrobe area. Use our hangers to store your clothes. They come in two sizes 65 or 80cm, with a white, black or chrome finish.

## 06 ADD DESKS

Try making a small workspace, our desks can be cut to size and will fit any alcove space. Desks can be positioned at any height using our wall rails, we start at a standard 72cm (720mm) from the floor finish, but they can be raised to any height. Try adding cable trays or mini shelves above to create a clutter free and wire free desk.

## 07 ADD CABINETS

Our cabinets with fold down doors are best, they can be cut to any size up to 160cm (1600mm). Available in black or white, please ask about wood doors. Great to store things away or used with a TV above to hide all your media boxes. They have open backs for easy access to plugs, sockets and cables.

Every system we design is different and so to help we have set out a number of different configurations, they are great for any size of alcove or running them from wall to wall. We have used an average width of alcove but we can recreate these in any size of space. Prices include Vat, we aim to deliver free of charge in the UK, however this is not always possible. Systems have been priced using 255 shelves. 345 shelf depths have been used on systems 5 & 12. Prices are for black or white systems and do not include wood fronts or bespoke colours.
